

# OpenDoors THE SECRET CIPHER DISC

**YOU WILL NEED:** scissors, a sharp pencil, sticky tack, a split pin, a paperclip

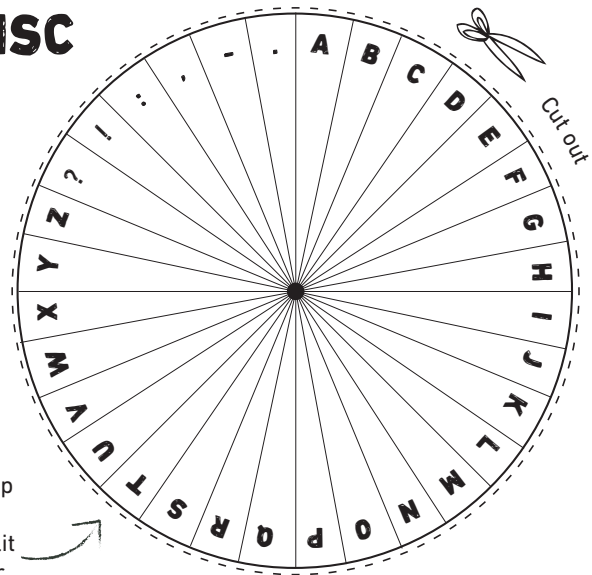

**STEP 1.** Cut out the two discs.

**STEP 2.** Put sticky tack under the centre of each disc and use a pencil to make a hole in each disc.

**STEP 3.** Put the small disc on top of the big disc and push a split pin type paper fastener through the holes. (If you don't have a split pin, you can put a drawing pin through and pin the wheel into a piece of wood or cork, or even thick cardboard. As long as you make sure that you can move both discs. Watch your fingers!)

Cut out

## HOW TO USE YOUR CIPHER DISC:

- Line up your cipher disc, so that the letter 'A' is under a symbol. So, if you want '✱' to represent 'A', then turn your disc so the letter 'A' is under the symbol '✱'. You can choose any symbol, as long as you remember it!
- Once you have lined up 'A' to the right symbol, you can write out a Bible verse or a message, replacing each letter with the symbol that is above it on your disc.
- To decipher a message, you just work the other way round! Once you know which symbol represents 'A', you can match all the symbols in the code to the right letters.
